

Hi, Speed Factoring.

Automated data transmission
with the DATEV interface.

bfs
finance

Factoring has never been easier

How you benefit from our DATEV cooperation

Immediate liquidity gains, receivables protection and relief in debtor management – the advantages of factoring have long been known. You should also already be familiar with the services of DATEV: software for almost all sub-disciplines of accounting facilitate the everyday work of companies, consultants or lawyers in an indispensable way.

Did you know, however, that BFS finance is a partner of DATEV and can, therefore, offer you the simplest solution to link these two aspects together? The DATEV interface facilitates the automated data transmission to our factoring institute and guarantees smooth processes right from the start.

In a standard format defined specifically for this purpose, your data is sent to us reliably, quickly, and under the strictest security standards

- Bookings
- Debtor master data and payment terms
- Open items including the respective recorded invoice addresses
- All other data

The provision of linked document files from a DATEV file management system and other imports are also possible, and offer decisive benefits:

- Time saving
- Incorrect entries are avoided
- Effortless overview through transparent display
- Manual interventions can still be carried out

DATEV will be happy to answer any questions you may have :
